PROJECTS

- **Kriptos Grafos:** A website with Flask API and React JS that can encrypt and decrypt messages with cryptographic algorithms. Role as Backend Developer.
- **HMIF Website:** A website for HMIF that has features such as about associations, scholarship info, job vacancies info, and others. This website was created using Laravel 8 and is version 1.0 of the HMIF website. Role as Backend Developer.
- **Jersey for This Year Website:** A website with Laravel 8 that displays jerseys from several football clubs from several leagues. Role as Fullstack Developer.
- **E-Voting Website for HMFH UPH Election:** An E-Voting website with CodeIgniter3 that used in the Head of HMFH UPH election for the 2021-2022 period. Previously, this website had been built by another developer and used in the 2020 election, so in this project, I just continued its development by adding some features that make this website more dynamic. Role as Fullstack Developer.
- **Urdailyhealth Website:** A website with Laravel 8 that helps Urdailyhealth educate about healthy living and displays a catalog of the products they sell. Role as Backend Developer.
- **Digon Catalog Website:** A website with CodeIgniter 4 that displays the Digon brand clothing catalog. Role as Fullstack Developer.
- **NAKA Marketplace:** A mobile application with React Native and Laravel 8 that is used as a place for merchants and consumers to conduct cake buying and selling activities. Role as Backend Developer.
